Functional Medicine & Health Coaching

In **Functional medicine** we address the underlying cause of disease. Our core philosophy centres around a holistic, personalised approach to health and healing. We use emerging tests and tools (*like DNA Testing*) to help identify critical imbalances that are the root of all illness.

As a **FM coach**, I look at the interactions among genetic, environmental, and lifestyle factors that can influence long-term health, and complex, chronic disease. I work through **DNAlysis** as a **Nutrigenomics Practitioner**, to better understand your personal diet, lifestyle, and supplement requirements.

Success Factor: The Executive Support

Insightful business acumen, business intelligence is a rare phenomenon. A focus on how to use intelligence to your advantage is the key to success.

There is nothing more important than the support of the executive team. The support of the executive team is the key to success. The support of the executive team is the key to success. The support of the executive team is the key to success.

The support of the executive team is the key to success. The support of the executive team is the key to success. The support of the executive team is the key to success. The support of the executive team is the key to success.

Let's Get Wired

The business intelligence (BI) industry is a hot topic, and it's not just because of the hype. It's because of the real-world results that BI can deliver. BI is the key to success in the 21st century. It's the key to success in the 21st century. It's the key to success in the 21st century.

BI is the key to success in the 21st century. It's the key to success in the 21st century. It's the key to success in the 21st century. It's the key to success in the 21st century. It's the key to success in the 21st century.

The Quest for Information

I don't know what to blame it on. The credit crunch, world recession or just bad management.

Why BI Projects Can Take Longer!

BI projects can take longer than expected for a variety of reasons. The most common reason is that the project is too large. BI projects can take longer than expected for a variety of reasons. The most common reason is that the project is too large. BI projects can take longer than expected for a variety of reasons. The most common reason is that the project is too large.

DISCOVER HOW A MOBILISED SALES FORCE IS A LIFESTYLE CHOICE

In this our third publication on Sales Force Automation (SFA) using our mobile work-based solution, discover how the Quton and MyMobility™ solution will allow your Sales Manager, Sales Person and Sales Administrator to achieve massive gains.

Every sales executive is under pressure to **improve sales performance** and ensure **predictable revenue growth** whilst being cost effective and sustaining performance over an extended period of time.

Imagine, as a sales manager, being able to **actively interact, in real-time, with your sales team**. Imagine being able to track your sales progress **bell-by-bell, over-by-over** like a 'one-day cricket game'.

Here's the million dollar secret:

Your sales administrator is able to communicate effectively with each sales person **while they're on the road** selling. Appointments, customer information, address information, route planning or schedule changes are delivered to the sales person's **mobile phone**.

At last, a solution that's enables the sales administrator to do more prospecting, quality background research and detailed planning.

As a Sales Manager, you are able to relax on this beach while the wheels of the sales process continue rolling at an ever-increasing speed.

The sales person is able to make more sales calls as less time is spent traveling between the office and customers. This is possible only because they don't have to go to the office to download their meetings – it's pushed to their mobile device by the sales administrator.

As a sales person you and a red phone can easily outwit your nearest rival because:

- You can generate a quote or proposal instantly.
- Knowledge is power. You can carry valuable information about your client on your cell phone so that you can deal with any query right on the spot.
- When the prospect is hot to buy, you can get an order signed instantly on your cell phone screen.
- You can get your product or service to the customer faster.
- You can keep your (and your company's) promises.
- You can branch admin so that you can be where you belong – in front of prospects and customers.
- You can plan your route so that there are no wasted hours spent in your car.
- And lots more.

The whole sales process is stitched together with our **back-office workflow** allowing the sales process to be propagated. I.e. if a certain task or activity is not completed as per the agreed time a **red flag** is raised. Therefore your sales results will be more **predictable and measurable**, ensuring that you can focus on achieving your personal goals.

The MyMobility™ and Quton SFA solution delivers sales information to the sales manager in **real time**. A management dashboard consisting a visual presentation of your **Key Performance Indicators** is delivered in a crisp and concise manner. The information is delivered as it happens in the field, no more months and reports. The information is fresh and can be trusted.

The sales manager is able to take **corrective steps immediately** ensuring that sales targets are met and that the sales team is productive. You can spend time on planning your next outdoor sessions.

STILL INTERESTED IN A CHANGE IN LIFESTYLE?

The Quton and MyMobility™ solution delivers sales information to the sales manager in real time. A management dashboard consisting a visual presentation of your Key Performance Indicators is delivered in a crisp and concise manner. The information is delivered as it happens in the field, no more months and reports. The information is fresh and can be trusted.

The **essence** of truth between you and your customer will be an **impressive one!** Customers are looking for a **new and fresh approach**; your mobile sales person will be able to impress them with their ability to react immediately and provide them with enough information to be able to make a decision immediately.

The good news is that the world will spread! Customers talk to each other and your sales team is **responsive of effectiveness** and **professionalism** will contribute to an increase in your market share.

YOU AND YOUR TEAM will be able to benefit from being part of a prosperous organisation. Think about it: no more paperwork, no more re-capturing of information in the back office, no more traveling to the office to get my diary.

Life without a PDA is like life without sunshine.

my mobility™
business. anywhere. anytime.
